

# 2019 PRODUCT DATA

**JNILOCK**<sup>®</sup>  
DESIGNED TO CONNECT.

# UNILOCK® QUALITY GUARANTEED

## GOOD CLASSIC

Our budget-friendly, Unilock Classic pavers and walls are manufactured to exceed ASTM standards for quality and strength. Available in classic shapes and styles, these products utilize a traditional **product mix of large and small aggregates**, that's consistent from top to bottom, with color mixed throughout.

## BETTER ENDURACOLOR™

The refined surface of Unilock Enduracolor products is achieved with a **two step manufacturing process** that combines a base of coarser aggregates for a **stronger foundation**, with concentrated color and **wear-resistant finer aggregates on top**. This process protects the surface from the appearance of fading over time because the top layer prevents large, lighter color aggregates from ever showing through.

## BEST ELEGANCE™

**Deep, rich colors** and a multitude of **unique Reala™ textures** combine to deliver the timeless beauty of Unilock Elegance. From the timeworn look of European cobblestones, to the classic luxury of riven natural stone slabs, our Elegance collection offers styles you can't get anywhere else and thanks to Ultima Concrete, the look you purchase is the look that will last, with up to **4x the strength** of poured in place concrete.

## EXCLUSIVE UNILOCK TECHNOLOGIES

### REALA™

Ultra realistic textures cast from Natural Stone, brick and historic cobblestones.

### ULTIMA™

A proprietary manufacturing process creates pavers with up to four times the strength of poured concrete.

### COLORFUSION™

A proprietary technology that disperses color randomly for a natural granite-like appearance.

### EASYCLEAN™

Factory sealed to provide integral surface protection from stains

There are two Clean Factors (CF®) to choose from:

CLEAN FACTORS (CF)	CF 90	CF 100
Pavers are pre-sealed at the factory	*	*
Enhanced resistance to weathering	*	*
Reduced dirt absorption	*	**
Stains from leaves, coffee, ketchup, mustard, wine and BBQ oils are easier to remove	*	**

## ASPECT RATIO

Simply defined, the aspect ratio is the overall length of a paver divided by its height.

$$\text{LENGTH/HEIGHT} = \text{ASPECT RATIO}$$

If an insufficient aspect ratio is used, any flexing or rocking caused by movement on the surface such as pedestrian or vehicular traffic, could result in breakage of the paver units. Not only is this breakage unsightly, but it can also compromise the integrity of the segmental system.

# ESTATE WALL<sup>®</sup> SYSTEM

**UNILOCK<sup>®</sup>**  
DESIGNED TO CONNECT.

# ESTATE WALL<sup>®</sup> SYSTEM

## COPING

LEDGESTONE<sup>™</sup>

BRUSSELS FULLNOSE<sup>™</sup>

NOTE: Coping sold separately. Several different products can be used for Estate Wall<sup>®</sup> coping. Ledgestone<sup>™</sup> and Brussels Fullnose<sup>™</sup> are two of the most popular.

The new enhanced Estate Wall<sup>®</sup> System with 3" high and 6" high units, is ideal for all residential landscape walls and vertical element construction. The front and back of each unit is rock-faced making it perfect for seat walls and the unique tapered units can be used for both straight or curved applications.

**MAXIMUM HEIGHT FOR VERTICAL APPLICATION - 21"**  
**MAXIMUM HEIGHT FOR SETBACK APPLICATION - 30"**  
**MINIMUM RADIUS - 3' 9" INSIDE RADIUS 4'6" OUTSIDE RADIUS**  
*\*Adding geogrid may increase installation heights.*  
*Contact your Unilock<sup>®</sup> Territory Manager.*

## CROSS SECTIONS

# CONSTRUCTING A RANDOM WALL

There is really no wrong or right when it comes to the pattern. Most important thing is to try to have consistent random look which is repeatable.

The easiest way to construct a random faced wall is to build them in linear clusters as shown here to the left. This is the simplest way to keep track of the pattern. Remember, the units are totally reversible to alternate between straight and curved sections in the wall.

(PATTERN B SHOWN)

## CORNERS

LAYER 2

LAYER 1

LAYER 3  
(LAYER 1  
REPEATED)

Corners are constructed in layers as shown. Use Unilock Concrete Adhesive to adhere all units. The main corner of your installation should be always constructed first and then the wall.

### LOCKING INSERTS

Depending on the application or the wall strength required, you can construct the Estate Wall™ System vertically or with a setback. To assist in alignment and locking, proprietary plastic inserts are provided with each bundle. Depending on the orientation of the insert will dictate whether it goes up vertical or with a setback.

**Note: It is strongly recommended that you use adhesive on all rows and for all applications to achieve maximum stability and strength.**

# ESTATE WALL<sup>®</sup>

## SYSTEM PATTERNS

RANDOM PATTERN A = 73% - 3" UNITS - 27% - 6" UNITS

RANDOM PATTERN B = 67% - 3" UNITS - 33% - 6" UNITS

3" Linear Pattern

6" Linear Pattern

3" with Vertical Units

3" & 6"

3" & 6" with Vertical Units

6" with Vertical Units

There are two random wall designs shown here that can be replicated out in the field. Once you become familiar with the system, the selection and placement of the units will almost become second nature and you can establish your own design.

Installing a random pattern in linear rows such as Pattern B is easier to construct, however, the 6" jumper units in Pattern A gives you the look and feel of an elaborate ashlar pattern.

Notes: \*\*Closed-end 48" coping available in Natural and Granite only. \*Special Order for Standard 925, and Corner units (45°). Lead Time Required. Minimum quantities apply. Closed-end coping units can be used to construct steps. Custom colors available (minimums apply). All measurements are nominal.

Unilock, through Risi Stone® Systems International, can provide preliminary site engineering for most commercial projects. Soils information, site drawings, and loading requirements are some of the information details required in order to provide you preliminary site engineering. Contact your local Unilock Representative for details. Retaining wall engineering software is also available free of charge from [www.unilock.com](http://www.unilock.com).

Internal Use Only. SST\_NE, SST\_CECOP\_ON

Cross sections are examples, and must not be used for construction.

**LOOK INSIDE!**

U-Cara fascia panels hang easily on the patented Sure Track™ backer block.

U-Cara Fascia panels can be placed anywhere along the Sure Track Backer Block, allowing for a variety of patterns, color and texture combinations not possible with other systems.

The U-Cara Multi-Face Wall System represents a revolution in wall design.

This patented system, exclusive to Unilock, is comprised of two basic components:

- | Sure Track™ backer blocks provide dimensionally accurate structure
- | U-Cara fascia panels provide unlimited design options

## UNICARE NATURAL STONE CLEANERS & SEALERS

For more information, visit  
[www.unicare-products.com](http://www.unicare-products.com)

### UNICARE NATURAL STONE ACID CLEAN **NEW!**

1L and 5L

Removal of:

- Cement Staining
- Efflorescence
- Iron Oxide (Rust)
- Cement mortar
- Grout

Note: Never use hydrochloric or sulphuric acid based products. **ONLY FOR ACID RESISTANT STONE.**

Carefully read all instructions and safety information on product label prior to application. For additional safety information, see MSDS.

### UNICARE NATURAL POWER CLEAN **NEW!**

1L and 5L

Removal of:

- Oil & Grease
- Food Stains
- General Dirt & Mud
- Light cement contamination (on acid sensitive surfaces)
- Sap & certain plant stains

Note: Carefully read all instructions and safety information on product label prior to application. For additional safety information, see MSDS.

### UNICARE BIOCLEAN **NEW!**

1L and 5L

Removal of:

- Black spot algae
- Green algae
- Plant stains from leaves, wood, trees, berries & flowers
- Organic staining from bark & compost
- Colored stains from food spillages, tea, coffee and wine

Note: Carefully read all instructions and safety information on product label prior to application. For additional safety information, see MSDS.

### UNICARE NATURAL STONE NATCOLORENHANCE SEALER **NEW!**

1L and 5L

Color Enhancement For Porous Stones

- No surface coating, sheen or shine
- Breathable
- Lasts several years
- Easy to apply

Note: Carefully read all instructions and safety information on product label prior to application. For additional safety information, see MSDS.

### UNICARE NATURAL STONE NATMATTE SEALER **NEW!**

1L and 5L

For Porous Stones

- No change of color
- No surface coating, sheen or shine at all
- Riven Sandstone & Smooth Sandstone

Note: Carefully read all instructions and safety information on product label prior to application. For additional safety information, see MSDS.

## CLEANERS

### TECHNISEAL® PROFESSIONAL GRADE OIL/GREASE REMOVER

Description: Professional Grade Oil & Grease Remover is an industrial strength petroleum-based product remover. It lifts and absorbs embedded oil and grease stains as it dries from a liquid to a powder. Specially formulated for concrete pavers, slabs and walls, natural stone, poured or stamped concrete, etc., Professional Grade Oil & Grease Remover works without damaging or discoloring the material and is easy to use. Packaging 1 quart container

Note: Carefully read all instructions and safety information on product label prior to application. For **additional safety information, see MSDS.**

### TECHNISEAL® EFFLORESCENCE REMOVER

Description: Unicare Paver Cleaner is specially formulated to dissolve efflorescence (whitish salt deposit) and remove ground-in dirt on paving stones and concrete, without discoloring or damaging surfaces. It cleans evenly, and enables the sealant to better penetrate the material to be treated.

Packaging 1 gallon • Box of 4 x 1 US gallon

Note: Carefully read all instructions and safety information on product label prior to application. For additional safety information, see MSDS.

**TECHNISEAL ORGANIC STAIN REMOVER**

Description: Formulated to remove moss and mildew as well as tough organic stains such as dead leaves, blood, wine and non-greasy food stains on concrete pavers, slabs and walls, natural stone, etc; requires minimum scrubbing

Packaging 700g • Box of 6 x 700 g • 500 units per skid

Note: Carefully read all instructions and safety information on product label prior to application. For additional safety information, see MSDS.

**TECHNISEAL SR SLURRY REMOVER FOR PAVERS AND SLABS**

Description: This is the most effective product available for removing cement slurry and polymeric sand haze on concrete or clay pavers and slabs. 1 gallon of concentrated product cleans up to 600 sq.ft. Coverage will depend on surface condition and product dilution.

Packaging 1 gallon • Box of 4 x 1 US gallon

Note: Carefully read all instructions and safety information on product label prior to application. For additional safety information, see MSDS.

SEALERS

**BP PRO ENHANCING STABILIZING SEALER**

Description: BP Pro Enhancing Stabilizing Sealer is designed specifically for use on block paving to stabilize joint sand and seal the paver surface. It is a water-based single component polymer that penetrates into the pores and seals the surface with a coating that gives you a semi-gloss finish. A green product that is solvent free and environmentally friendly, it is VOC, EPA, OSHA and FDA compliant. It is non-hazardous and non-toxic and can be used indoors and outdoors on new and existing projects. It can be applied immediately after completion, as it will not trap efflorescence and whiten. Easy to install and offering increased stain protection, it also reduces the formation of efflorescence. Packaging: 1 and 5 gallon available

Note: Carefully read all instructions and safety information on product label prior to application. For additional safety information, see MSDS.

**BP NATURAL STABILIZING SEALER**

Description: BP Natural Stabilizing Sealer is designed specifically for use on block paving to stabilize joint sand and seal the paver surface. It is a water-based single component polymer that penetrates into the pores and seals the surface with a coating that gives you a natural looking sheen. A green product that is solvent free and environmentally friendly, it is VOC, EPA, OSHA and FDA compliant. It is non-hazardous and non-toxic and can be used indoors and outdoors on new and existing projects. It can be applied immediately after completion, as it will not trap efflorescence and whiten. Easy to install and offering increased stain protection, it also reduces the formation of efflorescence. Packaging: 1 and 5 gallon available

Note: Carefully read all instructions and safety information on product label prior to application. For additional safety information, see MSDS.

**BP PRO WET LOOK JOINT STABILIZING SEALER**

Designed specifically for use on block paving to seal the paver surface and fuse the joint sand. It is a solvent-based single component polymer that creates a semi-gloss finish. It has the consistency of a light oil and is clear in appearance. It has a strong odor when in its liquid state and dries to a transparent semi-gloss finish with a darkened wet look. It can be used outdoors on new and existing projects because it is UV stable. WetLook Stabilizing Sealer can be applied immediately because it is breathable and does not trap moisture and it has outstanding coverage. The product is easy to install and offers great stain and environment protection. Cured product is heat and freeze resistant.

Packaging:

- 1 gallon container
- 36 cases per skid (of 1 gal)
- 55 gallon container (4 per skid) **SPECIAL ORDER**
- Box of 4 x 1 gallon containers (4 x 1 US gal)
- 5 gallon pail (36 per skid)
- 50-125 sq.ft. coverage per gallon (approx.)\*

## ADHESIVES

### UNILOCK CONCRETE ADHESIVE

10 oz. Caulk Tube: 20' at 1/4" Bead (Case of 12) 28 oz. Caulk Tube: 50' at 1/4" Bead (Case of 12)  
Ideal for step veneering and retaining wall cap securement.

**SPECIFICATIONS** - (Conforms to UN-STD. 1804, ASTM 2339-70 & FHA UM-60)

Color: Natural Sand Color Viscosity: Smooth Easy Gun Grade Mastic  
CLEANUP: Use mineral spirits or chlorinated solvents - read solvent supplier's caution notes for use of this product.  
STORAGE: Store in cool place, rotate stock. Keep at 70°F for 24 hours before use in cold weather. Store cartridges upright. Product does not have a flash point after it dries.

### TECHNISEAL STRUCTURE BOND (& GUN)

24 oz. Container: (Case of 12 / 84 boxes per pallet)  
Super-strength hardscape foam adhesive, specifically for the construction industry. Quick & easy precise application with the special "Gun II" dispenser; adjustable bead size. 3/8" bead size will yield up to 600ft.  
CLEANUP: Cured foam can only be removed mechanically. Use Structure Bond Gun Cleaner to clean gun upright. Product does not have a flash point after it dries.

## SANDS

### POLYBIND G2 SAND **NEW** NO DUST • HAZE FREE • NO BLOWER • ONE WATERING

Designed for paver joints up to 2".

PolyBind Complete G2 is made with calibrated sand that is mixed with sophisticated intelligent polymers, which neutralizes haze and dust. The polymeric sand application is now dust-free and haze-free. No blower is needed and the intelligent polymeric sand requires only one watering. It is recommended for a variety of uses including pool decks, patios, footpaths, driveways, parking spaces, pavements, etc. Available in Nevada Tan and Oxford Grey. It sets above the freezing temperature 32°F and can be used for joints up to a maximum of 2 in.  
50 lb/bag Coverage: 65-85 sq. ft. per bag for narrow joints / larger joints will require more sand

### TECHNISEAL® HP NEXTGEL POLYMERIC SAND

Designed for paver joints up to a maximum of 1 inch.

This paver sand is a high-performance polymer sand - it is the ideal product for heavy traffic and wet areas. Weeds and insects in paver joints is part of the past with this high-end product. This polymer sand is a mixture of graded sand (ASTM C144) and binder. It penetrates easily into joints, ensuring a fast and efficient jointing solution. This easy to use jointing sand will start to harden in minutes after water activation, and it quickly becomes resistant to erosion caused by water (rain, sprinklers and spray).

Colors: Urban Grey, Granite Grey and Tan

Packaging: • 50 lb bag

• 65-85 sq.ft. coverage per bag for narrow joints, larger joints will require more sand • 56 bags per skid

### POLYBIND G2 SAND

Designed for paver joints up to a maximum of 1 inch.

Polybind G2 Sand is a unique mixture of polymer binders and calibrated sand available in Nevada Tan & Oxford Grey. The installation of Polybind Sand is almost identical to using regular paver joint sand, except for the application of water. Once it sets, it becomes very firm and locks between the paver joints. This firm bond maintains pavers securely in place, being equally effective on both horizontal and sloped surfaces.

Colors: Oxford Grey and Nevada Tan

Packaging: • 50 lb bag

• 65-85 sq.ft. coverage per bag for narrow joints, larger joints will require more sand • 56 bags per skid

## GATOR AQUA ROCK

Manufactured to meet ASTM No.9 requirements for permeable paver joint units. The calibrated gradation obtained from the fractured high-strength granite makes it the ideal product for the bedding course & jointing material to collect surface water run-off and help stabilize interlocking paver surfaces.

Color: Granite Grey

Packaging: • 50 lb bag

• 20-25 sq.ft. coverage per bag for a 60mm paver

• 56 bags per skid

## IMPORTANT NOTICE

1. **DO NOT USE** Polymeric Jointing Sand on the following products: Series<sup>®</sup> Il Campo<sup>®</sup>

*If joint stabilization is required, use ordinary jointing sand and apply a stabilizing sealer. Contact your local Unilock office for recommended sealants and application specifics.*

2. **EXTRA CARE** must be exercised when using Polymeric Sand on the following products:

Courtstone<sup>®</sup> Cophorne<sup>®</sup> Richcliff<sup>®</sup> Senzo™ Town Hall<sup>®</sup> Tribeca Cobble™ Umbriano<sup>®</sup>

Unilock's Polymeric Jointing Sand can be used on these products but the fine polymers and binders in Unilock Polymeric Jointing Sand have a natural tendency to adhere to the surface and therefore extra diligence must be taken to pre-clean the surface prior to "wetting the sand in" and squeegee off the surface post application. Failure to do so will result in a "whitish haze" on the surface that is difficult to remove.

3. **IMPORTANT COMPACTION NOTICE:** Always pre-compact the pavers WITHOUT SAND IN THE JOINTS. This will facilitate proper leveling. Polymeric sand can then be swept into the joints. *Always use a compactor with a protective membrane attached to the bottom of the plate.*

Unilock Polymeric Jointing Sand, cleaners and sealers, must always be applied by a trained and experienced professional. Contact your local Unilock office for training and the most up-to-date best practices.

NOTICE: Unilock does not accept any responsibility for damage to the surface caused by the improper application and use of Unilock polymeric sand, sealers or cleaners.

# EDGE RESTRAINTS

## SnapEdge - One-Piece Edging That Does It All!

- Only one part required for straight runs or curved installations
- Built-in connector fastens one piece to the next - convenient 96" size, makes them easy to transport
- Unique 'Snip and Flex' feature speeds installations of curves and corners without pre-planning
- The open design allows a root system to grow through SnapEdge, further reinforcing the installation
- Engineered to provide a strong, easy-to-install edge restraint for concrete/clay pavers
- Nail hole bosses are full-length cylinders. Hammer blows will not fracture or force nail heads through edging

## PermEdge - Permeable Paver Edge Restraint

- Comes fully assembled - no field assembly required
- Installs on top of the stone chip setting bed
- One-piece design for straight and curved applications
- Integral section-to-section connector
- 100% recycled material

## GATOR EDGE RIGID

Gator Edge Rigid is made with 100% Polypropylene Co-Polymer. This will give it great strength as well as providing greater flexibility. Rigid can be locked together with the "Twist & Lock" connection system.

### Strong Lateral Support

A triangular angle at all key points has been engineered to provide a strong lateral support, essential for the load transfer on the paving units. The Rigid model can be modified into a Flex by simply cutting the connector between each triangular angle.

- 1 piece = 8 linear feet
- 1 mini-pack = 6 pieces = 48 linear feet

- 1 master-pack = 4 mini-packs = 192 linear feet
- 1 pallet = 28 master packs = 5,376 linear feet

- 1 piece = 8 linear feet
- 1 bundle = 24 pieces

- 1 bundle = 24 pieces = 192 linear feet
- 1 pallet = 16 bundles = 3,072 linear feet

# SILCASYSTEM

16" x 18-1/8" x 1-1/2"

## SILCASYSTEM

This system is ideal for applications where decking materials like wood lumber or composite lumber would have otherwise been the only choice. When connected to wood floor joists, Silca Grate™ grids provide a substructure (sub-floor) for a wide variety of decking materials: stone, brick pavers, slate, travertine pavers, marble or granite. Because it is engineered for strength and easy installation, this durable outdoor flooring makes it possible for residential do it yourself, as well as commercial architects, designers and builders, to create a new, exciting outdoor living space!

## PAVERSAVER UNI MAT

## PAVERSAVER UNI MAT

Universal Design - for use on most compactors

The PaverSaver Uni Mat is made out of a specially formulated urethane rubber. This material is soft enough to protect the paver surface and hard enough to minimally affect travel speed. The universal sizing fits most compactor plates and easily attaches and detaches from the compactor.

## UNILYFT™

- Install up to 700 sq. ft. per hour!
- Access tight or narrow areas
- Eliminate the need for a forklift on site
- Reduce labor costs
- Reduce shoulder, hand and knee pain and injury
- Improve your bottom line
- Financing available

Contact your local rep for details

## LANDSCAPE FABRIC AND GRID SYSTEM

### GEOGRID AND FABRICS

Strata 150 - 22.22 sq. yds/roll  
 Strata 200 - 200 sq. yds/roll  
 Filter Fabric - 6.25' x 360'; 250 sq yds/roll

### LANDSCAPE SPIKES

50lb case

### UNILOCK DRIVEGRID™ SYSTEM

- 120' x 13' Roll, 1,572 Sq.Ft./Roll, 56 lb/Roll

## BASE THICKNESS CHART (GENERAL)

APPLICATION	GRAVEL BASE	BEDDING COURSE	BACKFILL WIDTH (WALLS ONLY)
PATIOS, WALKWAYS, POOL DECKS	4" - 6" (10cm-15cm)	1" (2.5cm)	
DRIVEWAYS	8" - 12" (20cm - 30cm)	1" (2.5cm)	
STEPS, PLANTERS, RAISED PATIO	6" (15cm)	0 - 1/8" (0cm - 0.3cm)	8" - 12" (20cm - 30cm)
RETAINING WALLS UNDER 18" (45cm)	6" (15cm)	0 - 1/8" (0cm - 0.3cm)	12" (30cm)
RETAINING WALLS OVER 18" (45cm)	6" (15cm)	0 - 1/8" (0cm - 0.3cm)	16" (50cm)

Soil condition - In areas with poor soil conditions, (eg., heavy clay, disturbed soils) increase the depth of the base to provide more stability. Where poor **soil conditions** exist it may be advisable to contact an engineer when constructing a retaining wall in excess of 24" in height.

### Area = (Length) x (Width)

Area of a Circle =  $3.14 \times (\text{Radius}) \times (\text{Radius})$   
 Area of a Half Circle =  $1.57 \times (\text{Radius}) \times (\text{Radius})$   
 Area of a Quarter Circle =  $.78 \times (\text{Radius}) \times (\text{Radius})$   
 Area of a Triangle =  $(1/2 \text{ Base}) \times (\text{Height})$   
 Perimeter of a Circle =  $6.28 \times (\text{Radius})$   
 Perimeter of a Half Circle =  $3.14 \times (\text{Radius})$   
 Perimeter of a Quarter Circle =  $1.57 \times (\text{Radius})$

### Metric Equivalents

1 inch = 2.5400 centimeters  
 1 foot = 0.3048 meter  
 1 yard = 0.9144 meter  
 1 sq. foot = 929.030 sq.centimeters  
 1 sq. meter = 1.196 sq. yards  
 27 cu feet = 1 cu. yard

1 centimeter = 0.3937 inch  
 1 meter = 39.3701 inches

## TYPICAL PAVER CROSS SECTION

### ASPECT RATIO

Simply defined, the aspect ratio is the overall length of a paver divided by its height.

LENGTH/HEIGHT = ASPECT RATIO

If an insufficient aspect ratio is used, any flexing or rocking caused by movement on the surface such as pedestrian or vehicular traffic, could result in breakage of the paver units. Not only is this breakage unsightly, but it can also compromise the integrity of the segmental system.

# IMPORTANT NOTES

## UNILOCK PAVER PATTERNS

This Product Data Guide contains an extensive reference to patterns and designs. The purpose of these pattern swatches is to help the designer plan unique and exceptional designs. The percentages of products shown are based on the pattern and not on bundle configurations. In fact, there may be situations in which a pattern has been created with one particular size of stone, but that stone only comes packaged with two other sizes. This means that the designer will have to plan how the other components are used in the overall plan. This is usually accomplished by adding a border or an accent. As a result, overages or shortages may occur in certain patterns. The designer and/or installer of Unilock products accepts all responsibility for design and all associated costs incurred as a result of applying any of Unilock's suggested design patterns in a project. Please plan your project and review your order carefully prior to ordering.

## TRANSFERABLE LIFETIME GUARANTEE

Unilock provides a Transferable Lifetime Guarantee\* on the structural integrity of our paving stones, slabs and retaining wall units to the original purchaser of the product for residential use. Any materials installed and maintained to our guidelines, and subject to normal wear, that prove defective, will be replaced without cost. Color matching cannot be guaranteed and replacement labor is not included. Proof of purchase is required.

Excessive defective material (over the industry accepted normal of 2% for non-tumbled unit pavers) delivered to the purchaser will be replaced free of charge if a written claim is made within 5 days of delivery from the manufacturer. Such claims will not constitute reason for delaying payment. All goods shall be deemed accepted if completely installed. Inspect concrete products prior to opening bundle packaging to ensure that shape and color are as ordered. Unsatisfactory material must be available for inspection by Unilock to entitle the purchaser to any adjustment or credit. Inspect all concrete units during installation and set aside any which are chipped or cracked to use for any cut pieces required. The color of concrete products may vary significantly between production lots. Always install concrete units from several bundles simultaneously to ensure proper distribution of color. Prior to final compaction, inspect installed pavers for good color distribution. Relocate certain pavers, if necessary, to achieve desired color blend. **Textured pavers and slabs require a buffer between the plate compactor and the paver surface to prevent scuffing.**

\*Transferable Lifetime Guarantee: Register your project within 60 days of your dated proof of purchase to ensure your Unilock Guarantee is fully transferable! Simply go online at [unilock.com](http://unilock.com) and follow instructions. Once processed, you will receive an original Transferable Warranty Certificate for your records.

## PRODUCT HANDLING WARNING

Bundle Straps Under Tension - Use extreme caution when removing or handling straps. Always wear gloves, goggles, safety footwear, and protective clothing when removing or handling straps. Failure to do so may result in serious bodily injury or loss of sight. Cut all concrete products only in well ventilated areas. Inhalation of dust is a serious health risk. A "NIOSH" (US) or a "CSA" (CDN) approved respirator, safety goggles, hearing protectors, and gloves must be worn at all times. Always "wet-cut" or "wet grind" concrete products to minimize dust.

Do not stack bundled concrete products higher than 2 bundles high. Contents of the bundle may be unstable and subject to topple when stacked. Always use extreme caution and appropriate equipment when transporting or storing bundled concrete products. Failure to do so may result in serious bodily injury or death. Always obey gross vehicle weight (GVW) loading limitations and regulations.

Hazard Rating: Fire 0, Health 1, Reactivity 0. See MSDS Concrete Masonry (Pavers). Contact Unilock for complete sheet or view safety information at [www.unilock.com](http://www.unilock.com).

*Unilock assumes no liability or responsibility for loss or damage, resulting from the improper use or handling of our products, or from failure to follow instructions, warnings, and/or advisories on the product label, and on the MSDS sheet.*
